## What's In a Conversation

Elections Season often brings with it a sense of partisanship and stress that makes conversations difficult. Despite this, the need for meaningful conversations is essential no matter what the time of year. Karin Tamerius, founder of the nonprofit Smart Politics, [advises](#) finding common ground as quickly as possible and asking open-ended questions. Village Square founder and CEO Liz Joyner recommends leading with your experience and personal stance, saying that statistics are less effective in communicating political beliefs. And at the end of the day, it's always

important to decide when to step away. Psychiatrist Michelle Riba [says](#) that in addition to keeping an open mind, we should observe how much time we spend engaging with political content that could negatively affect our mental health, and learn when to step away from a conversation.
