I. Recovery Safeguards

II. Recovery Process

III. Stages for Reopening

IV. Reopening Guidelines

V. Recovery Metrics
SAFEGUARDS IN PLACE BEFORE OPENING

Ensuring health care system capacity:
- Adequate health care staffing, testing, ventilators and PPE, along with surge capacity

Protecting vulnerable populations:
- Adequate PPE and staffing to manage effective care and positive cases in institutional settings
- Adequate COVID-19 testing for residents and workers in institutional settings

Ensuring public health capacity to test, trace and isolate:
- Adequate capacity to test those in priority groups and those in congregate living and healthcare facilities
- Capacity to trace and isolate individuals with positive COVID-19 tests and to quarantine close contacts
- Collect data electronically from providers and labs, including race/ethnicity data

Developing protocols to keep workers and residents safe:
- Protocols in place to ensure safe reopening of businesses and institutions, including attention to physical distancing and infection control measures
PROCESS FOR STAGED REOPENING

- Review and evaluate efforts to slow the spread
- Engage with sector leaders to plan for reopening
- Develop guidelines for reopening
- Reopen sectors by stage

| Stage 2| Soon        | • May 8th: Florists, some retailers, car dealerships, golf courses and trails  
            • Soon: Other low-risk businesses (manufacturers, offices, retail)  
            • Essential health care  
            • Outdoor recreation and libraries  
            • Museums, cultural centers, galleries |
| Stage 3| TBD         | • Higher-risk businesses (body art, massage, bars/nightclubs)  
            • Movie theatres and bowling alleys  
            • K-12 Schools  
            • Colleges and universities |
| Stage 4| TBD         | • Highest risk businesses (entertainment venues)  
            • Large conventions  
            • Sporting and spectator events |
| Stage 5| TBD         | Fully normal operations |
MAY 8TH REOPENING

A limited number of businesses will be able to open on May 8th with appropriate safeguards in place.

**Florists, Toy Stores, Book Stores, Clothing Stores, Music Stores, and Sporting Goods Stores**
- Curbside pick-up only
- Must adhere to physical distancing and infection control protocols

**Car dealership showrooms**
- Must adhere to physical distancing and infection control protocols

**Golf courses**
- Pro shops closed
- Concession stands and restaurants are take-out only
- Must adhere to physical distancing and infection control protocols

**Trails**
- Must adhere to physical distancing
- Must use cloth face covering
Each sector will have a safe reopening guidelines that addresses the following areas of concern:

**Protecting and supporting worker health and safety**
- Limit in-person work and ensure that vulnerable workers have alternative assignments
- Supply and require use of face coverings and personal protective equipment
- Develop policies that enable employees to stay at home when they are sick

**Ensuring appropriate physical distancing**
- Limit occupancy in accordance with Safe Reopening protocols
- Ensure 6-foot distance between individuals as much as possible
- Manage employees’ schedules to enable physical distancing

**Ensuring proper infection control**
- Follow strict cleaning and sanitation standards
- Frequently clean high-touch surfaces

**Communicating with the public**
- Post clear signage to communicate protocols to visitors

**Ensuring equitable access to services for vulnerable populations**
- Prioritize access to critical services
- Move transactions and services online as feasible
ARE WE SLOWING THE SPREAD?

How capable are we of slowing the spread?
• Do we have sufficient hospital capacity, including ventilators and ICU beds?
• Is the supply of PPE adequate for all health care workers?
• Do we have sufficient testing capacity and testing supplies?
• Do we have sufficient case and contact tracing capacity?

How effective are we in slowing the spread?
• Are mortality rates by age, poverty status, and race/ethnicity relatively stable?
• Are hospitalization rates by age, poverty status, and race/ethnicity relatively stable?
• Do all high-risk populations have adequate access to testing?
THANK YOU
