

Ecological Restoration and Conservation:

Challenges in Times of Climate Change and Environmental Instability

Wednesday • November 9 • 12:00 to 1:00 pm

Room 217 • Edmunds Building (185 E. 6th St)
Pomona College Campus

At the seminar, you will learn:

- about a habitat restoration program in China's most significant giant panda reserve and
- how ecological restoration recovers degraded ecosystems and adapts them to survive climate change and other environmental instability.

Speakers:

Dr. Andre Clewell, a founder of the Society for Ecological Restoration, is a noted writer, lecturer, teacher, and restoration practitioner. He enumerated the principles and standards of restoration which are recognized worldwide.

Marc Brody, CMC '83, President of Panda Mountain, is a National Geographic grantee working to conserve giant pandas and their habitat in China's Wolong Nature Reserve, for which he is a senior advisor.

Lunch will be provided.

Seminar is coordinated by Environmental Analysis Program at Pomona College
